KONICA MINOLTA

PARTNERS IN IMAGING EXCELLENCE

KDR® Primary Digital Radiography System

Small Space
Big Functionality

Superior Image Quality

The KDR Primary includes a 17" x 17" detector that captures high-resolution digital images in seconds. Combined with ULTRA, the state-of-the-art Konica Minolta imaging software, the end result is detailed bone and soft-tissue visualization for a complete diagnostic picture from a single exposure.

- Superior Image Quality
- Compact Footprint
- Versatile Design
- State-of-the-art imaging software supports detailed bone and soft tissue visualization

The KDR Primary Digital Radiography System provides advanced digital X-Ray capabilities in a small footprint, equipping urgent care and family practices to provide general radiography services from exam rooms with limited amounts of space. Clinicians will have the imaging flexibility, image resolution and immediate results they need to make informed decisions faster, helping to boost throughput and patient satisfaction for your practice.

1. The KDR Primary fits into a standard, 8-foot ceiling room
2. Convenient swivel arm provides a wide range of motion, for flexibility and precision in positioning
3. Detector, tube and remote controls
4. Optional 3 knob collimator
5. Mobile table

Detector
AeroDR®
17" x 17" Detector
Multiple Configurations
AEC Options

Space Saving Design

The KDR Primary base and swivel arm install flush with the wall to maximize every square foot in your space, allowing you to avoid overcrowded exam rooms and provide your staff with freedom to maneuver and care for patients. There is also no permanent exam table required, giving you additional exam flexibility.

Engineered for Versatility

A full range of motion enables all imaging views required, while accommodating patients who are standing, sitting, lying on a table or confined to a wheelchair. The swivel arm rotates 135 degrees clockwise and counterclockwise and moves 39 inches vertically to easily arrive at the ideal exposure position. The detector also tilts 45 degrees in two directions.

Key Features		
Movement	Collimator	Options
Motor Assisted Variable SID 1000~1800mm (39.5~72in.)	Manual Control	Multiple Tube/Generator Combinations
Manual Rotation with Detents: 30°~120° Detents on 30, 60, 90 & 120 Degrees	Accessory Rails (Cones, Filters, DAP)	Three-knob Collimator
Motorized Vertical Movement: Vertical Travel 40~170cm (15.7~66.9in.)	Field Light	Weight-bearing Stand
Tube Rotation $\pm 90^\circ$	Six Blades	Pediatric Imaging Package
Detector Swivel $\pm 45^\circ$	Standard Radiographic Table	

Service Coverage

MXR Imaging provides National Service Support for multiple modalities. This includes coverage for CT, PET/CT, MRI, Ultrasound, PACS/RIS, and General Radiology Imaging equipment. We offer customizable service offerings to healthcare networks, hospitals, imaging centers and Independent Service Organizations (ISOs), as well as Orthopedic, Neurology, Cardiology and Veterinary clinics.

Konica Minolta & MXR Imaging

Together, MXR Imaging and Konica Minolta go beyond just imaging. These companies stand out by providing seamless coordination, exceptional service and the earliest access to new products, technologies and upgrades. MXR and Konica Minolta focus on innovation and customer satisfaction at the core of everything they do.
