Custom Solutions To Support Your Chiropractic Practice

MXR Chiropractic Solutions

MXR provides chiropractic imaging equipment, image storage/PACS, and ultrasound/stimulation units. We also offer a wide array of chiropractic table options that include adjustment tables, decompression tables, intersegmental traction tables, and spa/massage tables.

Digital Radiography

Digital Radiography (DR) direct capture X-Ray systems are available in wireless fixed and hybrid configurations; the appropriate DR product is carefully selected to meet the needs and volume of your practice. Many systems offer the option of full integration between the generator and the DR system providing a single interface for users.

Chiropractic Straight Arm

A single detector solution that offers the easiest method of positioning in the industry. The systems design insures alignment between tube and receptor at any angle. The full dynamic range of motion allows for easy imaging of the spine and extremities.

DDR (Dynamic Digital Radiography)

X-Ray That Moves!

What do you get when a series of individual digital images are acquired at a high rate of speed at low doses? X-Ray that Moves. This cineloop enables clinicians to observe motion of anatomical structures over time enhancing diagnostic capabilities. The motion series are analyzed and quantified with the DDR advanced image processing capability. DDR is not fluoroscopy.

Upper Cervical Specialty

MXR accommodates a specialty focus on upper cervical, including tilting buckys, head clamps, positioning chairs and more. Many of our chiropractic solutions include upper cervical measurement toolsets like AO and NUCCA.

Integrity Chiro-FS

Our exclusive full spine positioning system for Digital Imaging is specifically designed to provide chiropractic physicians with unparalleled ease of patient positioning for full spine imaging, while providing unmatched accuracy in digitally stitched images.

- **Easy as 1-2-3**

Three point detents automatically position DR device for perfect alignment, in AP and LAT positions

- **Full Vertical Stand**

Allows for greater support of patient body weight and consistent posture, which greatly reduces motion

- **Ideal Solution**

For Gonstead full spine imaging

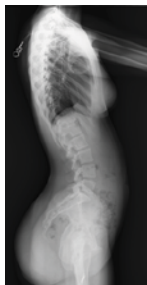

- **Optional Patient Assist Bar**

For optimal lateral positioning

Full Spine

- Full Spine images in one shot
- No stitching of images required
- Reduced chance of patient motion
- Large 17" X 42" imaging area
- Wireless operation
- Excellent geometric accuracy

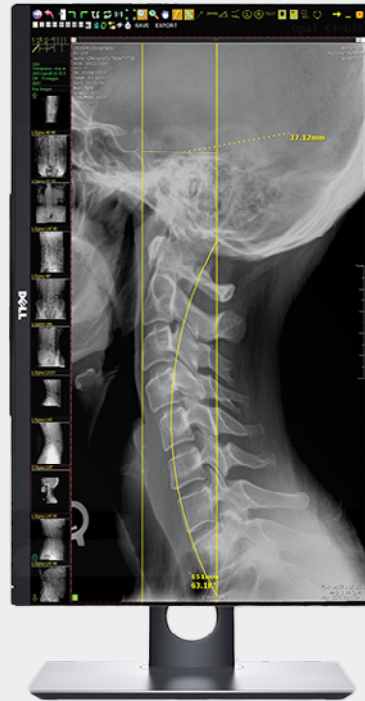

Software and Measurement Tool Sets

Chiropractic Specific Tools

Our DR Solutions for chiropractic include the most technologically advanced and user-friendly software applications in the industry. In addition to the highest resolution image processing algorithms, our software allows chiropractors to easily manipulate images diagnosing patient pathologies and using images to educate patients on the source of an issue has never been easier. MXR solutions allow the practice to have this powerful software anywhere in the clinic they choose (doctor's private office, report of findings room, patient exam rooms) to ideally fit your office workflow and methods of patient education.

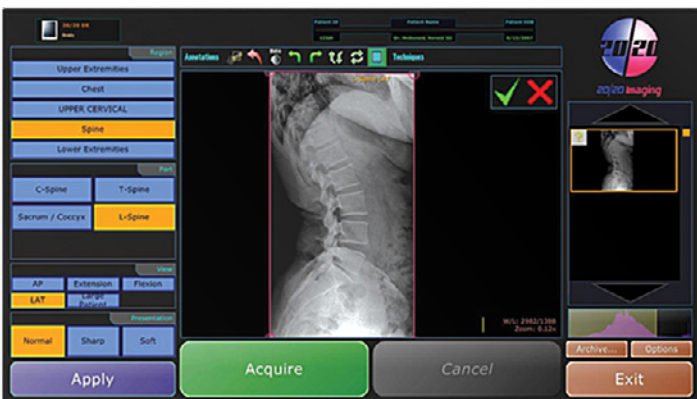

Chiropractic Tool Set Benefits

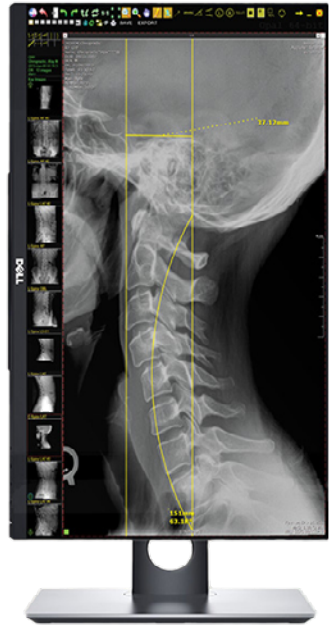

- NEW Penning Analysis
- Advanced Orthogonal Analysis
- Gonstead measurements
- Upper Cervical Analysis
- George's Lines
- Ilium Analysis
- Line Drawing
- Measuring
- Angles (Regular, Cobb)
- Cervical Curve
- Lumbar Curve
- Orthospinology
- Full Spine Stitching
- Spine Labeling

Full Generator Integration

Many MXR systems offer the option of full integration between the generator and the DR system. This means one single interface controlling both the X-Ray machine operations and the digital imaging software. This greatly improves ease of use, efficiency and patient flow.

Mini-PACS

- Burn/Import CDs
- Compare images (pre/post)
- Additional viewing licenses
- WORLDWIDE access: view from anywhere

Data Migration

- Our highly skilled team will consult and assist with your data migration needs

Service Maintenance

Keep your practice running smoothly

Service offerings are customizable and designed to meet the needs of the facility. From full service contracts that give you comprehensive service at a fixed budgeted cost, to time and materials, and everything in between.

- Single source dispatch
- Multi-vendor equipment installations and ongoing support
- Technical support across multi-modality equipment
- Robust supply chain including part depot repair facilities
- Preventive maintenance to full service agreements
- Project management for installations and relocations

Management & Coaching Groups

MXR Imaging, Inc. offers partnerships to select groups to provide costs savings and expedited services nationwide! Contact us for information on how to take advantage of this program.

Services

- Relocation
- Project Consultation
- Room Drawings
- Project Management
- Lead Shielding Report
- Purchase of Legacy Equipment

Financing

- Startup Loans
- SBA Loan Help
- Zero Down Financing
- Same Day Approval

Pre-Owned/Reconditioned Equipment

In addition to new equipment, MXR Imaging, Inc. has an extensive portfolio of pre-owned/reconditioned equipment for all your chiropractic imaging needs. Our products will maximize your clinic uptime, while lowering your total cost of ownership.

Consumables & Durables

MXR is a provider of consumable and durable medical goods spanning multiple product categories. Click or scan the MXR icon below to search our online catalog.
