KONICA MINOLTA

PARTNERS IN IMAGING EXCELLENCE

Straight Arm Digital Radiography System

Small Space?
Think Straight.

Superior Image Quality

The Straight Arm System includes a 17" x 17" detector that captures high-resolution digital images in seconds. Combined with ULTRA, the state-of-the-art Konica Minolta imaging software, the end result is detailed bone and soft-tissue visualization for a complete diagnostic picture from a single exposure.

- Superior Image Quality
- Compact Footprint
- Versatile Design
- State-of-the-art imaging software supports detailed bone and soft tissue visualization

The Straight Arm System provides advanced digital X-ray capabilities in a small footprint, equipping urgent care and family practices to provide general radiography services from exam rooms with limited amounts of space. Clinicians will have the imaging flexibility, image resolution and immediate results they need to make informed decisions faster, helping to boost throughput and patient satisfaction for your practice.

- 1. The Straight Arm System fits into a standard 9 foot ceiling height
- 2. Convenient swivel arm provides a wide range of motion, for flexibility and precision in positioning
- 3. System supports 17" x 17" and 14" x 17" applications
- 4. Mobile table
- 5. Optional weight-bearing stand saves exam room space

Space Saving Design

The Straight Arm System base and swivel arm install flush with the wall to maximize every square foot in your space, allowing you to avoid overcrowded exam rooms and provide your staff with freedom to maneuver and care for patients. There is also no permanent exam table required, giving you additional exam flexibility.

Engineered for Versatility

A full range of motion enables all imaging views required, while accommodating patients who are standing, sitting, lying on a table or confined to a wheelchair. The swivel arm rotates, both in the clockwise and counterclockwise direction, 135 degrees with motorized movement of 39 inches vertically to easily arrive at the ideal exposure position. The detector also tilts 45 degrees in two directions.

Key Features		
Movement	Standard Features	Options
Motorized variable SID distance, adjustable between 39.4" to 70.9"	Two blade manual collimator with accessory rails	Multiple Tube/Generator Combinations
Swivel arm range of rotation: 135° with detents on 30°, 0°, 90° and 120°	Standard radiographic table	AEC
Rotation of Tube-Collimator Assembly: ±180°		Three-knob collimator
Minimum floor to detector center distance: 17.75"		Weight-bearing stand
Detector angulations: 45°/-45°		Pediatric imaging package
		Remote or on-site applications

Detector
AeroDR® Flat Panel Detector
Aero DR HD 17"x17"
Universal CSL 17"x17"

Service Coverage

MXR Imaging provides National Service Support for multiple modalities. This includes coverage for CT, PET/CT, MRI, Ultrasound, PACS/RIS, and General Radiology Imaging equipment. We offer customizable service offerings to healthcare networks, hospitals, imaging centers and Independent Service Organizations (ISOs), as well as Orthopedic, Neurology, Cardiology and Veterinary clinics.

Konica Minolta & MXR Imaging

Together, MXR Imaging and Konica Minolta go beyond just imaging. These companies stand out by providing seamless coordination, exceptional service and the earliest access to new products, technologies and upgrades. MXR and Konica Minolta focus on innovation and customer satisfaction at the core of everything they do.
