

New York Quality Assurance Regulatory Testing Agreement

Multi-year agreements that cover testing, retesting, documentation, compliance guidance, and same day service.

THE
IMAGING
SOLUTIONS COMPANY™

NY Quality Assurance (QA) Regulatory Testing Agreement

Many of our New York customers have allowed the fully qualified engineering staff of MXR to successfully perform their facility's testing and service requirements under the MXR NY QA Regulatory Testing Agreement. New York State regulations are not new, but state and local health departments can and many times will perform inspections at any time to make sure health care facilities are in compliance. While many companies perform the Radiographic Quality Assurance/Quality Control (QA/QC) testing required by the Department of Health Bureau of Environmental Radiation Protection, our NY QA Regulatory Testing Agreement has been saving facilities money while maintaining compliant standards for years.

Best Practices

Keeping your facility's Radiation Safety/Quality Assurance program amenable with the New York State Department of Health Bureau of Environmental Radiation Protection requirements is an essential part of providing healthcare services in the state of New York. Choosing a qualified testing provider that can also service your equipment constitutes best practice.

An Industry Leader

MXR Imaging, Inc. is the largest independent distributor of imaging sales and service in the U.S. MXR provides a wide variety of new imaging equipment, reconditioned imaging equipment, service support, parts, training and radiology consumable and durable goods to the health-care market. MXR possesses an extensive imaging portfolio which includes: CT, MRI, Ultrasound, and General Imaging Equipment.

Why Choose MXR?

The MXR Imaging Team is one of the most experienced and well trained in the industry. Our field service engineers have an average of 20 years' experience and are trained and certified on all manufacturers and a wide variety of imaging equipment. Our goal is to ensure that your equipment operates with maximum efficiency, productivity and patient safety. Whether you are a large or small facility performing radiology procedures, allowing MXR's experienced staff to assist you in your regulatory compliancy efforts will save you time and money.

Our NY QA Regulatory Testing Agreement not only covers QA/QC testing, documentation, record keeping, and the required procedure manual, but also includes the labor cost of the service call that would be required to bring your system(s) back into compliance if a failed test should occur. The cost of the re-test and compliant documentation following necessary repairs is also included.

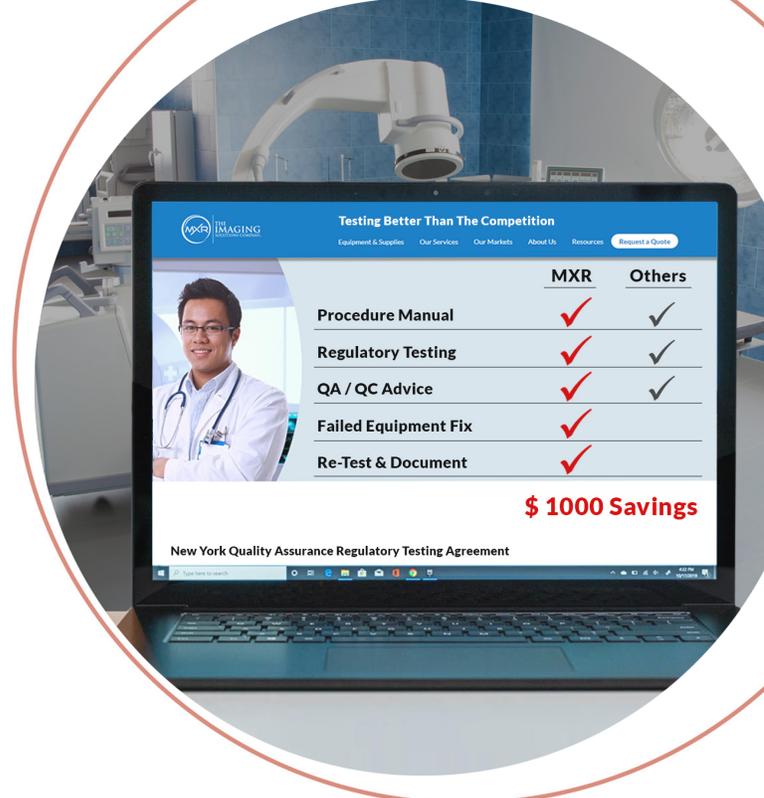

MXR NY QA Regulatory Testing Agreement includes:

- Maintenance of required procedure manual
- Regulatory compliant testing for: X-ray, CR, DR, Primary Diagnostic Monitor
- Regulatory guidance throughout the life of the agreement

Companies with a "Testing" agreement often stop with the items above, but not MXR. Our agreement also includes:

- Upon receipt of "Failed" QA/QC test results, same day assessment and service (labor included)*
- Upon completion of service, QA/QC Re-test and Documentation of Renewed Compliancy*

*MXR's NY QA Testing Agreement includes service to bring your system and facility compliant after a failed test. This does not include parts, but includes re-testing and renewed compliancy documentation. MXR saves you an estimated \$1,000.

Tri-Annual Agreement Discount

All our three-year term agreement customers receive a special discounted rate and uninterrupted compliancy testing for three years.

Service and Technical Support

MXR Imaging is a leading provider of diagnostic imaging service solutions. We leverage our proprietary technologies and capabilities to provide high quality and comprehensive service across multiple vendor platforms and modalities, including MRI, CT, Ultrasound, X Ray (analog/digital/portable), and C-Arms. Our team of experienced and reliable field engineers undergoes continuous training on the most current platforms from major manufacturers, providing them the experience necessary to assist with all your service and maintenance needs. Our training and competency certification process ensures our engineers are fully qualified to maintain, diagnose, and repair your imaging equipment.
