

ORTHOPEDIC

MXR Imaging can help lower the cost of ownership of your imaging systems and increase the throughput in your practice.

THE
IMAGING
SOLUTIONS COMPANY™

An Industry Leader in Orthopedics

We understand that the needs of an orthopedic practice are different than the needs of a hospital or other specialists. Because of this, we have developed relationships with leading imaging manufacturers allowing us to meet the unique and demanding workflow needs of your orthopedic practice. Whether a single-practitioner or a multi-site practice, we can tailor an effective, precise solution.

Increased Throughput

Through the expertise of our Imaging Specialists

MXR Imaging understands that efficiently moving a patient from waiting room to exam room to discharge is paramount to your practice, and we want to provide the exact solution to achieve optimization and increased throughput. Through a consultative sales process, our sales team will

analyze the current workflow to understand the needs of the practice. We will then develop an effective solution to meet those needs. Whether a simple digital room upgrade, the addition or replacement of an MRI or the replacement of PACS, MXR Imaging can meet that exact need.

Systems

Multiple modalities, makes, and models

As the largest independent imaging reseller in the US, MXR Imaging can effectively offer solutions from the leading manufacturers in the orthopedic imaging space. Our best of breed imaging solutions include CR, DR, CT, MR, C-Arm, bone density, ultrasound, and general radiographic systems. MXR Imaging sells across multiple manufacturers, so our sales team can truly develop and recommend an unbiased solution. We have the resources to assist you every step of the way.

Service and Technical Support

Expert, attentive service

We understand that x-ray is the lifeblood of the orthopedic practice and, if not working properly, can greatly hinder the overall workflow of the practice. With a service team of over 250 fully trained service engineers nationwide, MXR Imaging is available to respond in a timely manner to address any imaging service need. Our experienced service team will work with the practice to determine their service needs. We then develop and recommend an effective service solution. Whether preventative maintenance only or a full-service contract on an MRI, MXR Imaging is able to meet your service needs.

Installation and Relocation

For every aspect of your imaging project

MXR can efficiently and effectively de-install, install, rig and transport your units. We can also collaborate with your architect or project manager to plan necessary construction to achieve your ideal imaging space, including special shielding.

Training

Applications training on your system

As you upgrade imaging devices for your practice, MXR can provide applications training for your technologists on many units we sell.

Supplies

Providing you with everything imaging

We are the source for all of your imaging essentials: positioning aids, radiation protection garments, lead markers, aprons, sponges, etc. Call us today and let us help you save money on what you need.

"Developing a specific solution that enhances, not hinders the workflow of an Orthopedic practice is critical to success for that practice. Having worked in orthopedics for several years as an x-ray technologist, orthopedic technologist and in administration, I understand all aspects of an orthopedic practice and its distinctive needs. Traveling all over the U.S. working with hundreds of orthopedic groups, I can share what is working in other parts of the country which may be the exact insight needed to streamline a practice's workflow."

- Bill Fikes, MXR Digital Imaging Specialist
