

THE  
IMAGING  
SOLUTIONS COMPANY™

**NATIONWIDE**  
Imaging Services, Inc.  
AN MXR IMAGING COMPANY

## Expert Sales and Services For All Your PET/CT Imaging Needs

### Selecting a System

MXR provides you with several choices across multiple brands of pre-owned and reconditioned equipment. Our quality PET/CT systems come with a standard MXR warranty. We can also take your old system in on trade to offset the cost of your new scanner.

Not sure what PET/CT system to purchase? Our Imaging Specialists can help you decide which PET/CT system is right for your needs. Through our consultative approach, we can guide you through the decision making process. From a single system purchase, to the build-out of an entire imaging department, we have the resources to assist you every step of the way.

### PET/CT Service Solutions

Service Solutions are tailored to the clinical and economic needs of the facility to include Full Service, Shared Service, PM Agreements and other options. MXR Imaging offers a cost-effective, ISO-13485 certified alternative to the OEM for your MR service and repair. If your warranty has expired, choosing MXR Service can save you up to 30% on your total cost of PET/CT system ownership compared to OEMs.

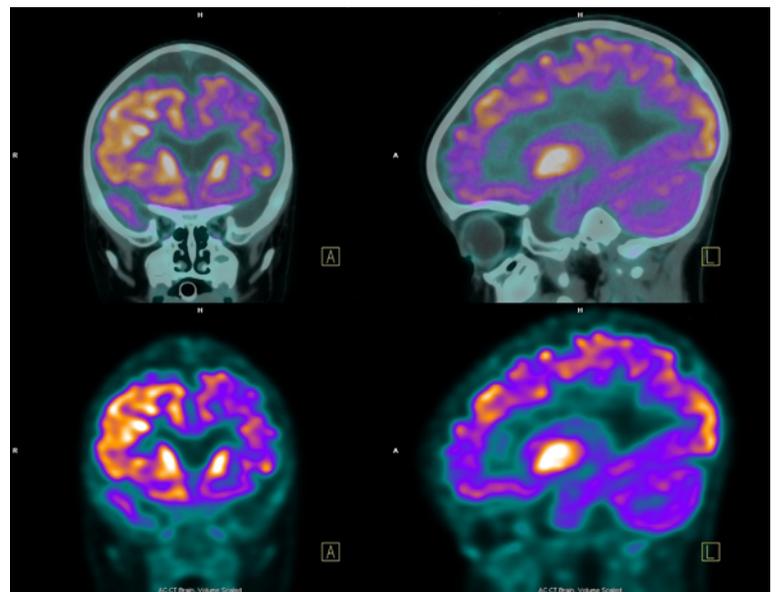

### Clinical Applications Training

As part of a comprehensive turn-key solution, clinical applications are routinely included with our Platinum Certified Pre-Owned scanners. We offer applications training for multiple modalities over many different manufacturers. We provide this service throughout the United States and Canada. CEU credits are available for your staff.

## The Largest Independent Distributor of Imaging Equipment and Service

MXR Imaging provides you with several choices of reconditioned PET/CT systems ranging from 16 slice to 64 slice cameras with BGO or LYSO detectors configured for oncology, cardiology or neurology applications. Our field service engineers are highly trained and experienced in servicing PET/CT systems.

## Mobile Interim Services

MXR's fleet of mobile PET/CT Systems is available for you to continue serving your patients during the build-out of your imaging suite or while you are upgrading your PET/CT. We provide a complete, stand-alone unit shipped to your facility for the required period of time to provide uninterrupted patient scanning.

Our Mobile Imaging Trailers are insulated, self-contained units which enables them to operate adjacent to your facility in hot or cold climates. In order to enable a larger working environment, we offer extra-large 12' x 60' coach trailers.

## Installation and Relocation

MXR Imaging can efficiently and effectively de-install, transport, and re-install, your PET/CT units. We collaborate with your architect or project manager to plan necessary construction to achieve your ideal imaging space, including specialized shielding. Every aspect of your imaging project is considered and addressed.

## Platinum Certification

The Platinum Certified Pre-owned CT, MRI, PET/CT, and Ultrasound Systems from MXR Imaging will allow you to achieve your imaging objectives with a cost-effective solution. Our Platinum Certified products will maximize the revenue potential of your organization, while lowering your total cost of ownership, and enhancing the clinical outcomes of your patients.

ISO Certified

## Parts

MXR Imaging sells pre-owned and reconditioned parts for your PET/CT unit. Our PET/CT parts provide you with a high quality, low-cost alternative to the OEM.

## Supplies

We are the source for all of your PET/CT supplies: patient positioning aids, radiation protection items, hot labs, pin sources, table pads, phantoms and consumable supplies.
